Nirali Amin

Product Designer + Occasional Craftsmith

about

I am a product designer driven to create meaningful user experiences by simplifying complex problems through thoughtful, research-led design. I believe that good design goes beyond solving problems, it should make systems more intuitive, accessible, and human. I integrate technical thinking with a human-centered approach to design practical, scalable solutions, especially within complex digital products.

Josys
Product Design Intern — Jan 2026 - Aug 2026

Designing a unified IGA SaaS platform that enables IT teams to manage access, software, and hardware from a single place. Focused on simplifying complex workflows, improving governance, and driving cost optimization across the organization

Camorent
Freelance Product Designer — Aug 2025 - Dec 2025

End-to-end design of a consumer application for a camera rental platform. Involved in research, ideation, prototyping, visual design, and handoff.

Omara Technologies
Product Design Intern — May 2025 - Jul 2025

Helped digitize the Advocate Welfare Fund system using LLMs. Enhanced the UX of the registration form, focusing on accessibility and ease of use.

Railway Design Centre
Industrial Design Intern — May 2024 - Jul 2024

Collaborated in a team of four and led the washbasin redesign, from research and concept development to material exploration. Focused on enhancing usability and manufacturability through iterative prototyping and testing.

Havi.co, IIT Gandhinagar
Design Intern — April 2022 - May 2022

Promoted Havi products through social-media creatives across various platforms. Contributed to the UI/UX design of the company website and redesigned packaging for the Havi toy kit to enhance user engagement and brand appeal.

Tops Technology, Gandhinagar
Android app developer — Jan 2020- Jul 2020

Developed the PIPAS Android app to address public infrastructure challenges, improving accessibility for thousands of users. Focused on empathy-driven design, leading to a more intuitive experience.
